STATE OPIOID RESPONSE GRANT

GPRA Federal Reporting Requirements

The GPRA Client Outcome Measure Tool is:

» A 30-minute survey

» A structured interview

» For clients receiving SOR-funded treatment or services

» Administered at intake, follow-up, and discharge

SOR-funded organizations are only required to administer the GPRA Tool at intake. The Behavioral Health Administration has partnered with The Evaluation Center at the University of Colorado Denver to collect and report GPRA data for the six-month follow-up and discharge requirements.

The GPRA Tool (Survey) was developed using existing data collection instruments, including the Addiction Severity Index. Measures collected in the tool include the following:

- **Demographics**
- **Substance Use**
- **Planned Services**
- **Living Conditions**
- **Education**
- **Employment and Income**
- **Legal Status**
- **Mental and Physical Health Problems, Treatment, and Recovery**
- **Social Connectedness**

SOR-funded organizations are encouraged to use client responses to the GPRA Intake Survey to fulfill their internal intake requirements, if applicable. All GPRA Intake Survey questions must be asked as stated in the tool.

GPRA Intake Process

Visit **www.SORColorado.org/sor-gpra/intake** for links to the following steps required to complete a GPRA Intake:

Step 1: Gain Client Consent

Step 2: Complete Client Contact Form

Step 3: Administer GPRA Survey

Technical Assistance and Training

The Evaluation Center provides GPRA-related trainings and technical assistance to all SOR-funded organizations. This includes providing trainings related to the GPRA intake process, developing GPRA-related resources, as well as providing additional technical assistance and overall support as needed.
