

How to Use the CRAFT Dashboard

About the Dashboards

Data from the facilitator survey is available from **May 2023** to the present.

By default, the **first page** of the dashboard is filtered to the **most recent month** of data.

Data can only be viewed one month at a time on this page to avoid representing duplicated counts of participants. The **second page** can show up to **six months** of data at a time.

Sometimes facilitators report the number of **CRAFT groups** without also reporting the group format, modality, etc. For this reason, the number listed in the CRAFT Groups key metric may be **greater than** the number of CRAFT groups represented in the rest of the dashboard.

Tips and Tricks

Enter the password to view data. Any time you refresh the page or use the *Reset* button, you will have to reenter the password.

Navigate between dashboard pages by clicking on the lefthand side of the screen.

or

Use filters on the lefthand side of the dashboard to explore the data.

Select all or deselect all facilities using the checkbox next to *Facility*.

OR Hover over a facility to only select that facility.

Select any section of a pie chart to filter the entire dashboard by that category.

Use the *Reset* button in the top-right of the page to clear all filters in the dashboard (a). Hover over the *Reset* arrow in the top-left of any chart to reset that chart only (b).
